rousselot.com

We, ROUSSELOT, hereby certify that our following product manufactured in Rousselot Angoulême plant (France):

Peptan[®] Collagen Peptides F

is made from fish skins coming from Tilapia and Pangasius.

All fishes used by Rousselot are deemed fit for human consumption and guaranteed by health certificates signed by official veterinarians. They only come from establishments registered by the European Union for the production and import of edible fish.

The fishes come from the following countries:

Costa Rica, Ecuador, Brazil, Honduras, Mexico, Indonesia, Iceland, Vietnam.

This list of countries can be modified due to a modification of Rousselot supply. However, the suppliers are exclusively selected according to regulatory and Rousselot requirements as indicated above.
